Art Unit: 1711

Applicant's election with traverse of Group 1 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that the process claims broadly include the process limitations referred to in examiner's restriction requirement. This is not found persuasive because the alternate process offered by examiner does not require the process operations of applicants' process claim and it is maintained that the product claims may be prepared by a materially different process such as the one offered by examiner. Applicants have not shown that examination of both inventions would not require undue burden to examiner, and restriction is maintained as proper and is hereby maintained.

The requirement is still deemed proper and is therefore made FINAL.

Claims 23-43 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

This application contains claims 23-43 drawn to an invention nonelected with traverse in Paper No. 6. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1711

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruxvoort et al.(5,219,462).

Bruxvoort et al. discloses polymers inclusive of polyurethanes which contain cellulose as an abrasive particle which read on the foams of applicants' claims (see column 7 lines 35 – column 8 line 47, and example 16, as well as, the entire document). The amounts of additives and reactive materials identified by applicants' claims are encompassed by the teaching of the reference owing to the similarities of the materials utilized.
